

Video 5: Overview of the StoryPhones Bookshelf software

When you open up the software you'll see that the main screen is split into three panels: The MP3 player panel (on the left), the BookShelf panel (in the centre) and the Players panel (on the right).

The MP3 Player Panel

- You can use the MP3 player panel to listen to an audio file in the StoryPhones BookShelf library on the computer.
- Click on the green button to play the track, the blue button to pause and the red button to stop play.

The BookShelf Panel

- This is your virtual audio bookshelf.
- It shows you all of the audio content that you have in the StoryPhones BookShelf library on your computer.
- This could include music, songs, and games as well as audio stories.

The Players Panel

- This shows you the Headsets and Remote Consoles that are currently connected to the computer and allows you to delete and add audio content on the players.
