

## Video 1: Your New StoryPhones System

- StoryPhones will give you a versatile way of allowing children to access audio resources.
- You will be able to use StoryPhones in lots of different ways to give children differentiated access to stories, songs and music and to incorporate this into your planning.

### When you open the box

You will find:

- **The headsets:** each headset is an MP3 Player with a rechargeable battery; robust and designed for young children with no movable parts to break.
- **The Remote Console:** this is an MP3 player with a loudspeaker, and built in microphone for recording.
- **The Base Unit:** a multi-way USB hub and charger for the players.
- **Also:** a USB Cable; the power Supply; lanyard; CD; the manual and paperwork.

### Straight out of the box

- Your system is supplied ready to use. After unpacking the parts, you will be able to simply press the green 'Play' button on the Headset or the Remote Console and the player will start playing with some pre-loaded stories and songs.
- You will have to press and hold the 'Play' button for around 10 seconds to wake up the players as they will have gone to sleep while packed in the box. If they don't wake up immediately, they will do so when plugged into the Base Unit.
